By the way, I sent this letter to the EPA yesterday, re: EPA's 2017 Inspection report findings. FYI.

Greetings Sally,

Sorry for the delay. I do not think the safety and prevention CalARP or PSM regulations specifically call for replacing MHF in 5 years.

Hope this helps,

Paul

Thanks Paul.

TRAA had a meeting with TORC last week. They told us something I don't believe is true.

They claim that the new Refinery regulations not only require them to create a plan for inherently safer technology but require them to replace MHF starting in 5 years.

I studied those regulations fairly carefully and I didn't reach that conclusion. If it WERE true, I imagine the Refinery would be screaming bloody murder. Instead they were very matter of fact.

I feel they might be trying to disarm us. It's all taken care of, so to speak. Take it easy.

What's up?

Sally

When will there be a corresponding meeting for Wilmington and Torrance?

Thanks.
